SELECTED NATIONAL BIBLIOGRAPHIES

PREFACE

The following list of national bibliographies is used in Mr W. S. Biscoe's course in elementary bibliography in the New York state library school.

It also includes preliminary lists of bibliographies of bibliography and of general bibliographies. The former is a somewhat long list, including all those general bibliographies of bibliography of special interest to American librarians from a practical or historical point of view. It excludes those devoted to the bibliographies of a special subject and is grouped somewhat arbitrarily to bring out special features desired in the classroom. The list of general bibliographies is brief and is arranged in two groups; 1) the useful works of the present day, 2) a few of the more noted works of the past.

The national bibliographies of each country are placed together and the countries are arranged in the order of the importance of their bibliography for American libraries. Under each country the purpose has been to give the most useful working list of its national bibliographies, covering, as far as possible, the period from the invention of printing to the present day. They are arranged chronologically according to the period covered by each work, those of the present day, ending with the current annuals, monthlies and weeklies, coming last. The published price of modern works is usually given, and an approximate idea of the cost of books out of print is given either from their price at recent auction sales or from catalogues of secondhand dealers. In general for current annuals and periodicals the yearly subscription price is given.

The following are the forms used for foreign prices with their approximate American equivalents :

£	pound	$4.87		krone; plural, kroner (Danish and Norwegian)	27c
c	centime	⅕c	L	lira	19c
d	penny	2c	m	mark	24c
f	gulden (Dutch florijn)	40c		peseta; plural, pesetas	19c
fl	florein (Austrian)	49c	pf	pfennig	¼c
fr	franc	19c	s	shilling	24c
kr	kreuzer (Austrian)	½c	sk	skilling	1c
kr	kreuzer (German)	⅔c		spd speciedaler	91c
	krona; plural, kronor (Swedish)	27c		thlr thaler	72c

The call numbers are those used in the New York state library. The class number only is given for books not yet in the new card catalogue. Volume and page numbers are separated by a colon; e. g. 3 : 145 means v. 3, p.145.

New York State Library School

RELATIONS TO NEW YORK LIBRARY SYSTEM

While the University of the State of New York, incorporated May 1, 1784, is a supervisory and administrative, not a teaching body, the library school is an essential factor in the new work undertaken by the University when reorganized in 1889. By the new University law the regents are made distinctly responsible for the library interests of the state. New York led all the states in caring for that education which can be given to the people at large only through public libraries, by establishing in 1838 the district library system, an example followed by 20 other states.

Careful examination of the causes which led to the decline of the system 15 years later shows clearly that the comparative failure was due to lack of proper administration, and that if the taxpayers' money is to do its full work there must be systematic training in the elements of librarianship for those who are to carry on this important part of the educational work. Such training can clearly be best and most economically given, not at a college, but in the state library and in daily communication with the department intrusted with the administrative library work of the state. Thus in the library field the state must repeat its experience with the public schools, from which no satisfactory results could be had, in spite of great appropriations, till normal schools and academic training classes were established to prepare teachers for their work.

To meet this need, the library school which opened at Columbia university Jan. 5, 1887, was transferred Ap. 1, 1889, to the state library at Albany, with its faculty and collections. Since the transfer the school has steadily increased its entrance requirements and the extent and thoroughness of its teaching.

Admission. Candidates must be not less than 20 years of age and of recognized fitness and character. Graduates of registered colleges may be admitted without examination except in some subject required by the entrance examination in which they may be deficient. Only those holding regents diplomas, or graduates of high schools or academies registered by the regents as maintaining a proper academic standard are admitted to entrance examinations.

Summer session. An elementary summer course intended for assistants and librarians of the smaller libraries who can not leave their positions for the full course is also given. For those engaged in library work in New York state the summer course is provided without charge as part of the work of the home education department.
